Pelletiers' Saw Mill Reduced to Ashes

The Blaitmore Brick Company, Ltd., are planning for big improvements in connection with their already well equipped plant. As soon as the warm weather is far enough advanced another dry pan will be installed and this will likely be followed by the installation of an additional screen, a steam shovel and third grinder.

With the carrying out of their proposed plans, the Blairmore Brick Co. will be able to increase their capacity from 40,000 to 80,000 brick per day.

For some time past the demand for Blairmore brick lass been much larger than the supply. Considerable of Blairmore brick is shipped to outside points, some as far away as Vancouver, Edmonton and Winnipeg where it is being used. In the construction of many of the principle buildings. The local method was a black mass of ruins. The mill was covered by insurences the output at the local factory, brick will have to be shipped in from outside points.

Defends His Cause

(To the Editor.)

Dear Sir.—In your issue of Jannary 4th there appeared, from the
pen of an "Old Time Conservative," an article with reference to
the Colemn port office in, which
the writer lauds the present incumbent of the office and at the
same time attempts to belittle the
qualifications of one whose name
has been mentioned as the appointee to the position of postmatter, and also casting veiled
insimuations upon what we deem
the character of another gentleman
whose name was, mentioned in
connection with the position.

The writer further state; that, in,

Lake City

Crow's Nest Pass Electric Railway and is already tapped by the Pass line of the C. P. R., while the G. N. R. has already approached to within a few score of miles and must eventually pass through this admirably located town.

Lake City

Is located by the shore of Crow's Nest Lake, only a few miles east of the provincial boundary between Alberta and British Columbia, and just north of the international line. In reality, it is at the top of Canada where the majestic Rockies tower in serene magnificance over great chasms and numerous fiords, reflecting their presence on the waters of this beautiful lake. Here also are afforded the very best tasks for the daring mountain climber and for huntsman who desires to outrival the quiet ways of the Rocky Mountain goat, sheep, deer or elk, which are the monarchy thereon. In close proximity are numerous timber, mineral and fuel resources, development of which is now in its initial stages. These resources include gold quartz coal, iron and pulp wood.

Crow's Nest Lake has long been looked upon with promise as an admirable location for health and tourist resorts, and but now this promise is being realized. Plans for hotels, etc. are being arranged, as well at boat houses, and the most modern pleasure yawls will soon glide over the surface of this beautiful lake.
